

“

In my experience the Atego is the most efficient truck in its segment. The operating costs are low, the reliability high. In addition, it has good body-mounting compatibility. We've been running a new Euro VI Atego in the fleet

STRONG TYPE : THE ATEGO 1218

since November. The vehicle is popular with our teams and matches our mission of offering the customers removals that are environmentally friendly right down the line.”

Giovanni Grillo, Managing Director of the Milan-based removals specialist Grillo Antonio, 40 trucks and vans

L WITH BOX BODY AT GRILLO

“Worry-free removal”

That’s the message on the removal trucks operated by Grillo Antonio. Founded as a haulier in 1961, the family-run company has specialised in removals since 1964. In every respect, quality is its hallmark. Grillo was certified three times by TÜV Profi Cert: according to ISO 9001, ISO 14001 and ISO 18001. For the photo, the company’s MD took us to the modern “City Life” district, which was built on the former trade fair site in the northwest of Milan, about 15 minutes away from the centre by car. He has taken on a particularly large number of assignments here.
